

Gary's Past Predictions

The following is a list of some of Gary's more well-known predictions. All facts are verifiable and documented either in print or on radio tape.

In recent years Gary has not been doing predictions because he figured out years ago that if he gets a vision of something bad happening he can change the energy behind it and change the outcome.

- Sept 11th Terrorist Attacks

In November of 1999 Gary started having visions of New York being engulfed in black smoke from a downward-like explosion, caused by terrorists, leaving thousands of people dead. Gary said it would happen in the third quarter of 2001. He stated this on numerous radio shows most notably "The Morning Zoo" in Las Vegas.

- Train Wreck in Madrid, Spain

On Gary's 2004 list of predictions, (sent to all forms of media) Gary predicted that there will be a train wreck in March. On March 11, 2004, a series of coordinated bomb attacks on Madrid's commuter train system killed at least 186 people and wounded over 1000.

September 11, 2001 Terrorists flew two commercial airliners into the World Trade Center buildings in New York City, bringing both buildings to the ground, and killing thousands of people.

- Bill Clinton Scandal

In December of 1997 Gary predicted in the New York Post that Bill Clinton would be caught red handed with his fate left in the hands of an assistant.

On January 17th of 1998, the world learned all the intimate details of the relationship between Clinton and his White House intern Monica Lewinsky. Everything from the tie she gave him to her semen-stained blue dress ended up in the infamous Starr report.

- Volcanic eruption at Monserrat

In early June of 1997, Gary predicted a volcanic eruption that would devastate a populated island.

He also saw an evacuation that would leave several dead.

On June 25 the island volcano of Monserrat had a large eruption leaving 10 dead and 9 missing.

- Discovery of "space fossil" from Mars

Documented in National Examiner, Feb. 1994, Gary predicted the discovery of a "space fossil" showing the existence of life in outer space.

August 7, 1996 scientists find a meteorite fossil believed to be from Mars contains evidence of prehistoric life.

- Victory of long shot candidate George Pataki for NY Governor

Predicted during an interview for TV and the Daily News, Gary chose George Pataki to win the NY Governor's seat, even though he was consistently behind in the polls.

November, 1994, Pataki wins Governor's seat, upsetting the incumbent Cuomo.

- Earthquake in Mexico

Foretold in September, 1994, there would be a large quake in Mexico within three months. Gary saw no deaths from the quake, even though it would be a strong tremor.

December 11, 1994, Mexico City was hit with a quake registering 6.3. There was building damage, but no fatalities because the quake was centered in the ocean miles from the coast. This prediction was one in a series of thirteen correct visions in a row concerning earthquakes.

- Oil spill tragedy in the Middle East

July 19, 1989, Gary tells of an oil spill in the Middle East that will dwarf the Exxon Valdese event.

January 25, 1991, Iraq releases millions of gallons of crude oil from Kuwait's main tanker loading pier, spilling it into the Persian Gulf, creating the worst oil disaster in history.

- Chemical Warfare in the Gulf

May, 1991, Gary foresees the harmful effects and genetic disorders for Desert Storm soldiers as a result of Chemical weapons exposure. Gary also says the problems will not be known until after the war, when symptoms become widespread.

November 1993, US Dept. of Defense concedes that the chemical weapon Sarin found on battlefield.

- Devastating Hurricane to hit Florida

August 26, 1991, Gary tells of a hurricane to hit and destroy parts of Florida in one year. The path seen is through Miami.

One year later, August 25, 1992, just 22 hours shy of the exact prediction, Hurricane Andrew came ashore just south of Miami, ravaging Southeast Florida.

- Death of Tip O'Neill

January 3, 1994 Gary sees a fatal heart attack for house speaker Tip O'Neill.

January 6, 1994, just three days later, O'Neill dies of fatal heart attack during a routine check-up. O'Neill had no history of heart trouble.

- Bob Dole falls off Stage

Just days before Bob Dole's visit to Chico, CA, Gary tells radio listeners that he sees Dole falling off a stage.

September 19, 1996 newspapers across the country show a photo of Dole lying on his back after he fell through the false railing of a stage in CA.

- Gorilla rescues child

A wild prediction even for Gary, in the spring of 1996 he told his radio co-hosts he saw a gorilla making headlines for acting like a human.

August 17, 1996 a gorilla in Brookfield zoo near Chicago rescued a 3 year old boy who fell into the exhibit. A great amount of press coverage resulted.

- Disappearance of military plane

On live radio in early 1997, Gary predicted a largely publicized disappearance of a military plane somewhere in Colorado.

April 6, 1997 papers report the search for a missing jet timber had moved from Arizona to Colorado after it was lost just a few days earlier. The disappearance was featured for weeks in news headlines.

- TWA Flight 800

In June of 1996 Gary predicted on the radio a horrible, missile like explosion of a U.S. passenger jet headed for Europe which crashes into the ocean in a ball of fire.

July 19, 1996 headlines around the world report 229 people dead from the crash of TWA flight 800 when an explosion downed the plane just off the shore of Long Island.

- Atlanta Olympic Bombing

Gary's vision for the Atlanta Olympics was a terrorist type bomb where someone would die. He also envisioned a tower like structure falling as a result. This was predicted on Atlanta radio with Gary McKee.

July 27, 1996 Atlanta's Centennial Olympic Park is rocked by a terrorist style pipe bomb, killing one person and injuring many others. A lighting tower from a nearby stage was damaged and nearly collapsed in the explosion.
