

"Bunnies Around the World"

For the past several years, June has been visiting hospitals and children with disabilities delivering Gorgeous stuffed Bunnies of all sizes! The children remember June's visits to them and still keep their stuffed friend that they personally name. It carries them through the rough times of the loss of their parents, their failing health or operations and their personal fears.

De Young wants our children to not feel alone as she herself did until she received her own special purple bunny that she carried with her as a very young child. She held it as she pulled through the emotions of her own parents' divorce at 18 months old; seeing her childhood doctor; traumatic hospital visits to be with ailing family members; and then the sudden death of her beloved Uncle Bob. The purple bunny went everywhere as it received holes and scotch tape to heal him and cover his puffy wounds. She even knitted him a jacket to keep him warm.

Now June will be providing 'Bunny Friends' for children worldwide! Won't you please be a part of placing the 'Hop in the Step of a Child' who needs a close puffy, fuzzy friend?

June's plans are already in action for Holiday delivery of hundreds of plush bunnies plus a book named "The Bunny Connection"!
