[WELCOME TO OUR FIRST NEWLETTER OF 2016](#)

Welcome and thanks to our new supporters who chimed in after the Coast to Coast appearance of our colleague, Dennis S. Watts. Bravo and thanks for caring. We will be advising our subscribers of new conference calls weekly which will be coming up, to get up to the minute news and views of the situation as best we know it. We will help with what things you can do to arm and protect yourself against any of the health and safety issues which we know are there, and to protect your family from the hazards of poisoning over time. Check our site regularly for details and information.

<http://wtsenates.info/nexus/>

Then when you have time, please visit our Bling section on the ways that you might be able to help. We have made a call for soft contributions, so please stay tuned for those small things you might be able to do, in helping overall.

<http://wtsenates.info/nexus/Contact/Bling>

[Open Letter to:](#)

**Mr. Donald J. Trump,
Candidate for President,
Trump Tower,
New York, New York.**

Dear Sir:

Everyone must congratulate your results over the last few months, admirers and detractors alike, given the debates you're stirred and the public's awakening that finally seems to have materialized. Everybody is noticing, regardless of whether they love you or hate you. The people have noticed, the pink media has noticed, the controllers have noticed, the critics have noticed, everybody has noticed. Given the rise to your lofty heights now in the polls, it is clear that you have given the people what they've wanted for some time; truth and candor. The days of 'Politically Correct' sugar coating are seeming fast disappearing. People's ability today to really handle the truth is gaining strength surely; shit, feces, dung, crap, poop, or not. We just want it straight.

I see a man who has no difficulties in handling the truth and you seem to want to direct the American people right to the front door of truth as well. For that, for that reason, I believe that the more that people

The opinions or views which are expressed or presented here are not necessarily those of NEXXUS NEWS or those of NEXXUS ENVIRONMENTAL CORPORATION, CO. Reader discretion is advised. -Editor.

come to study or appreciate your thinking, the more that they come to appreciate who you are. Truth merchants have not been popular of late, so I fully understand the criticisms you take daily. Truth is difficult to handle for some, especially the controllers, who have commercial interests being threatened everywhere, like never before.

Sadly for all of us, my truth is that there is still a hot reactor in Japan, nearly five years later, which continues to this day to spew unrelenting radioactive poisons on us and the Pacific. Every political operative in sight is either trying to avoid the subject all together, will not report of it, twist it or outright lie about it continually. Our world dies more now every day, close to the end of the planet's health. The Earth has been in the process of dying for so long that the Pacific Ocean is barely, if at all alive. With only 10%, if that, of the Pacific's sea life remaining and the rest is on a respirator, waiting for the funeral director to show up. We are in the deepest of circumstances and yet so many in America's hallowed halls of power refuse to lift a finger, given all we know today.

I have heard you speak often on what things you take greatest pride in, and it seems that those where you have had to spend no money, drive you hardest. If that alone does not prove that one does not need merely money to be successful, nothing would. I am respectfully now asking that we work together in seeing a charity ball put together in New York, likely Trump Tower, [where we can put together a Charity Benefit for Nexus Environmental concerning its work on the public relations program and educating people on the situation in Japan and our continued work on how this dire situation cannot be swept aside any longer. We are at an extinction level threshold now.](#)

I would be honored sir if you would not only attend, but that you and your people handle the invitation list of those you feel who could help aiding our work in media, along with our work in seeing the deployment of various American technologies which can and will solve the situation in Japan, the very soonest that is allowed to happen.

The situation now sir is so out of hand, that you need a quick briefing as to just how bad things really are today. Troubling that:

- 1) Pacific plankton is now becoming endangered to the point where the Earth's oxygen supply will become imperilled and we are literally choking ourselves to death.
- 2) There are so many fish stocks and so many species of aquatic life that mankind will no longer be able to depend upon to eat from, to feed any of us. Crab is finished all up and down the US. West coast, the salmon stocks are decimated, terrible, and every day we're discovering how much less there is to catch or eat from the Pacific, dead or already poisoned.
- 3) There has not been a baby whale born in the Pacific for some time now, and marine biologists are very worried about their habitat overall, as it is directly tied to mankind's ability to be able to survive. The canary in the mine, is just about dead.

- 4) RADIATION COUNTS UP AND DOWN THE WEST COAST HAVE BEEN AT EVACUATION LEVELS FOR MONTHS and there is going to be a major outbreak of cancers, all kinds, which some 50 million people have been exposed to. The net result of all of this is merely that not only will Obama Care be a dead duck, the entire American Medical system is headed for bankruptcy if things continue, where the poisoning will bring newly created endless lines of cancer patients and sick people. The money will merely run out.
- 5) This form of poison is not only killing us, but the all the rest of the ecosphere along with us. All plant life and wildlife comes to be affected through this. All life. Nobody gets away, unaffected. Nobody. Not your family sir, mine, nor anybody else's. No one's financial status will save them.

Mr. Trump, we're in trouble, the schoolhouse IS on fire and all the authorities are silent. Totally Silent. I need your help sir, your input and your guidance to seeing this all important matter now finally recognized and dealt with once and for all.

More months of waiting and inaction will only push us to the very edge of the cliff, which we are now staring at. If we continue to do nothing, even just more waiting, that will leave us soon at a point of no return. And that sir, is not what our forefathers envisioned, nor anything which a loving, kind and generous God would allow for. Yes, for all our sakes, all our children, I would even beg. I would beg for our humanity, as we are all important in Divine eyes. None can get left behind. I know you know that, please, if you can, please come to our aid.

In the short run, nobody has had the guts, the intestinal fortitude to finally step forward and tell the truth on this. You showing your leadership as coming President becomes unquestioned. None of the existing power base, their agents or peers, nobody has acted. Yet every day, this silent killer is allowed to continue, getting worse and worse. They thought sir we'd be too busy or stupid to notice, well sir, we've noticed. And once the real truth gets out about how this has been sequestered from the public eye, there are going to be a lot of angry people. Those people will surely look to one man who gave them the truth all along.

I hope you and I can stand in good company, bringing forward what is the truth about this calamity before us. Ignoring it is truly not the answer.

Respectfully,

Stephan Venczel, President
NEXXUS ENVIRONMENTAL CORPORATION
Ph. 587-777-5331

If you want to see and feel how badly we've done, we would recommend that you sit and watch the video link below. It concerns a man by the name of Paul Gilman, and he speaks to whales. Its humbling.

Overview

HOLLYWOOD HEALTH AND HOPE, LLC (the technicians and experts) is now putting forward its Hollywood Health© clinical program. Our clinics are a private initiative to establish a network of independently owned and operated triage clinics dedicated to the earliest possible diagnosis and remediation of radiation poisoning and sicknesses. Our clinics will provide advanced diagnostic tools as well as access to some of the most advanced medical breakthroughs ever offered or seen. Along with the independent clinics which the company will own and operate, other clinics state-wide will be established under Hollywood Health management to serve the three largest employee pools by industry segment in the State of California; namely entertainment, aerospace and computing.

Through our clinic locations, Hollywood Health clientele will gain access to phenomenal, advanced technologies to overcome the health and wellness problems which they may be facing with radiation poisoning. First access will only be available to our first clientele or 'Alpha Group' of US. Veterans. However, to the delight of many employers, those same advanced technologies will be availed to those approved corporation's for their employees, contractors, subcontractors and the like, along with their attendant families to use as well. More on our Alpha Group, later.

The earliest symptoms of Acute Radiation Syndrome (ARS) are nausea and disorientation. If you start vomiting within an hour of exposure this

implies a massive dose of radiation, making it far likelier you will die without medical treatment.

Radiation depletes clot-forming platelets in the blood, leading to severe bruising and wounds that won't heal. In certain cases, this manifests as purpura, discolored patches caused by bleeding beneath the skin.

Uncontrolled bleeding, the body's inability to clot, bleeding spontaneously from the nose, mouth and rectum. Subtle manifestations also relate to bleeding gums without any reason.

Bloody diarrhea, vomit, similar symptoms as above, different cause. Radiation depletes the cells of the intestinal wall and stomach. This irritates the stomach and intestines, leading to bloody vomit and stools.

Radiation burns; clinically known as cutaneous radiation syndrome, or CRS, the first sign is itching. Exposed skin may then turn red, blister, develop open sores and slough off.

Hair Loss - Radiation damages hair follicles, which could lead to rapid hair loss.

Headaches, weakness and fatigue - Due to anemia from the loss of blood cells, weakness and fainting may occur. Also leads to hypotension, or extremely low blood pressure.

Mouth Sores - Ulcers in and around the mouth, a visible manifestation of ulcers all along the esophagus and digestive tract.

Seizures and tremors - Intense and prolonged exposure to radiation can impair the central nervous system. This can lead to a general lack of muscle coordination and seizures.

Fever And Infections - What will ultimately kill someone suffering from radiation sickness? Radiation destroys bone marrow and white blood cells, leading to increased risk of bacterial, viral and fungal infections.

For us here personally, the saddest and most profound effect of radiation poisoning is that of infant mortality and genetic breakdown. In fact, mortality rates in the US, but especially along the American west coast, are up in hundreds of percent allegedly. Stories abound that hospital administrators are wrapped up in legal documents, sometimes known as NDA's, along with other 'behavioral modification techniques' like financial pressure, to keep much of the radiation poisoning problems under tight wraps today. So truly, one wonders what is real, and what isn't.

Clinical Deployment

Hollywood Health is assuming a leadership role in the nature, scope and makeup of the radiation clinics it is now opening. Along with promoting the advanced healing technologies it has now internally, much of what will be left of either affordable health care or medical insurance, will lean heavily upon the successes and movement forward of Hollywood Health and its plans and programs. While seeming bombastic to say that, no matter how much denial and/or how much refusal by the oversight of governments, businesses, agencies, the United Nations, or even the mongrel media, it now matters not. And even though these groups, all of whom incidentally seem co-opted as they insure that nothing comes of or is ever done to stop the universal poisoning of mankind using radiation. We are now seeing the largest and most prolific attempt of mass genocide ever in human history. All while being done in total denial, yet while being in vogue.

For the California launch, we are expecting to open just after Valentine's in Oceanside California. The Oceanside Hollywood Health Clinic will be first dedicated to the lives and health of the service men and women who served aboard the United States Ship Ronald Regan during its tour in 2011 and specially the crew who were exposed to the massive radiation plumes which were in and around Fukushima Japan. These folks are now internally referred to as our Alpha Group.

The financial model Management has employed to launch our first public clinic, is to insure that any and all Vets or members of our Alpha Group are first diagnosed and dealt with using the most advanced diagnostic tools ever developed. These services will all be provided at no cost to the Vet themselves. Nothing. Free. As each case is determined and moved forward, each case may come to even see subsidized or even free supplements and other aids provided to the Vet, entirely free as well.

From our Oceanside facility, our secondary launch will then be directed to the studios, talent agencies, production companies, post production, animation and CGI houses are being asked to band together for what is surely a new common enemy for large employers in California: absenteeism. People not coming in, as they are suffering from chronic migraines, brain fog, insomnia, chronic fatigue, cold & flus, nausea, loss of energy, cannot focus, and truly worse. The addressing of these special medical needs or issues in new and unique ways, will become the "The Hollywood Health way. The right way."™

The expertise we have today, along with the advances of tomorrow, will allow us to deal with the diagnosis of radiation poisoning and its remediation thereof, to put the body back into a healthy and self-reparative state.

Hollywood Health maintains a Board of 12 experts who are leaders in their various fields and who oversee the protocols, the mediation

techniques and systems etc. which are to be provided free or near free at the Hollywood Health clinics.

More coming, stay tuned...
