

Does the Ancient Templar Cross Contain Math Codes that Support Cellular Rejuvenation?

It has been written that many great thinkers have attempted to decode the mysteries of the universe using math, geometry, music, frequency and architecture. The popularity of the movie: The DaVinci Code and Dan Brown's book, *The Symbol*, have sparked our imaginations concerning information that has been kept hidden from the populace.

While Brown's book hints at architecture as hidden knowledge, the work being done by the Institute of BioAcoustic Biology & Sound Health indicates that the ancient Templar cross contains math codes that support cellular rejuvenation.

The ancient idea of Signature Sounds (an individualized sound that each of us carry) combined with modern computerized technology utilizes the premise that the body can identify and prescribe for itself using the algorithms of vocalized frequencies to accurately quantify, organize, and extrapolate biometric information.

In an attempt to shift perceptions concerning health care, the Institute is reporting novel research that supports the assertion that ancient architectures and languages contain math codes that support frequency-based cellular regeneration. The idea of revisiting lost knowledge through the use of computer assembled biometrics provides a new paradigm that may change the face of future medicine.

The Institute's 30-year-old logo (seen here) casts a shadow of the Templar Cross and has become the foundation of the BioMarker experiments that have led to astounding changes in health as the body attempts to use intrinsic frequencies to heal itself.

Using frequency as an innate healing modality is an ancient tool brought forward into the modern era through BioAcoustic Biology; a major innovation that allows a look at wellness through individual BioMarker assessment.

Studies conducted at the non-profit BioAcoustic Research Institute, under the direction of Sharry Edwards, MEd, have shown that persons with similar stresses, toxins, diseases, traumas, genetic syndromes, deficiencies...have similar, if not identical, vocal anomalies; demonstrating that math can be much more than a measurement tool. Math, as a frequency matrix, can serve as the template to perceive and manage health and wellness.

It usually takes a well-funded scientific breakthrough or an overwhelming catastrophe to facilitate a comprehensive change that actually makes a difference. People are slow to embrace new scientific information because anything fundamentally different from the status quo intimidates them. Although a major disaster forces transformation, people don't always adjust willingly. The most profound and permanent way to cause a shift in perception is through affirmative life experience.

In the near future BioMarkers displayed as biofrequencies, will be seen as indicators of health that are as common as taking your temperature or blood pressure when you visit your health care provider. MIT, the Mayo Clinic, several universities and Pfizer Pharmaceuticals are working with these principles; with AT&T declaring that "bioacoustics is the medicine of the future".

Known as Vocal Profiling or Voice Mapping, the idea of analyzing the frequencies and modulations of a human voice to determine emotional, biochemical and structural status of a person is being used by medical facilities and schools; for military applications; in police work for verification purposes; in research studies for issues thought to be incurable, to determine wellness patterns; to relieve the stress of pain; to determine exposure to toxins and pathogens. From working with the firefighter's union and engineers at ground zero, to assisting physicians in determining the potential cause of health related mysteries, this novel work is Star Trek medicine in the making.

**"Sharry Edwards' work defines and demonstrates the unifying field theory that defied Einstein."
John Apsley, MD**

"The list of how vocal analysis can be used seems endless and provides an avenue for the integration of energy medicine with the allopathic approach," states Roman Chrucky, MD. Dr. Chrucky credits this innovative approach with predicting his heart attack and for helping his body reverse a diagnosis of prostate cancer. "My experiences with this technique are very real because they have made

a difference in my own life and those of my patients. I'm very happy with this work and very happy that Sharry has stuck to these ideas in the face of much adversity. In my opinion she's the doctor's doctor. I send all my perplexing patients to her even though by definition, what she does is not medicine."

Known as Human BioAcoustics and Vocal Profiling, this innovative biotechnology is the inspiration of a uniquely talented pioneer, Sharry Edwards, MEd.

Edwards and her dedicated staff have attempted to organize a network of people who are being trained in these techniques so that a groundswell of people can attend to their own communities should a health catastrophe occur. She cites the threat of a pathogenic pandemic or assistance in space travel as examples of how this system could be of service to establish the idea of Math as Medicine.

No one argues that our present health care system is in crisis and that people are seeking alternatives. Buckminster Fuller said "In order to change something, don't struggle to change the existing model. Create a new model and make the old one obsolete." Edwards, with her small, yet highly innovative educational, research facility, is striving to do just that.

"We have clients clamoring to be seen", states Edwards, "because they have seen our clinical results although we tell people that we are looking for data, if they get well that is their problem.

Vocal Profiling is an innovative biotechnology inspiration by the pioneer of Human BioAcoustics, Sharry Edwards, MEd.

of New Medicine, 2003
p. 566**

From birth to death, we use sounds to express our needs and emotions, but there are additional layers of information hidden within our words. In modern times we possess only limited conscious awareness of this information for ourselves and as a means to understand the intentions of others.

In developing these techniques, The Institute of BioAcoustic Biology has created a dilemma. How can this

incredible wellness potential be provided to the public when there aren't enough trained practitioners to serve the need?

Should the information be provided the public, free of charge, until enough people of vision recognize the potential of this work and come forward to be a part of it? It will take vision and sacrifice and there may be a time when this technology will be challenged by those who desire to maintain the economic power and dominion over our health. However, the technique of using math as a basis of well-being may be the means of restoring our intrinsic right to Self-Health and maintenance.

To help facilitate this idea, an online WorkStation has been created for the public and offers several computerized evaluations each month. SoundHealthPortal.com

Online opportunities using nearly all computer platforms for people to do their own online, real time assessments which can easily result in computerized Management Reports that are designed to be shared with your wellness provider. Tutorials are available to the public but especially to those who want to learn the protocols of BioAcoustic Vocal Assessment to help support their communities and their families should medical assistance become unavailable. Even at the beginning levels over 200,000 cataloged frequencies can be utilized as bundles to provide BioAcoustic Solutions for health.

The intention behind the many public classes conducted by Sound Health is to create unity in health care by creating a system of SELF-HEALTH for THE PEOPLE, by THE PEOPLE. Each month a two-day workshop centered around a specific topic is offered to the public free of charge and includes software that can be used with minimal instruction. Over 350 instructional videos and tutorials are offered online through Vimeo and the Sound Health Portal.

Whoever controls health controls the quality of life! Health is much more precious than wealth! If people can be provided an avenue to have command over their own health then we have dominion over our own evolution! Sound Health has provided the ground breaking steps to explore this pioneering path to Math as Medicine.
